

2022 BSCS WORCESTER MAY

# SIMMENTAL

SHOW & SALE

**SATURDAY 7<sup>TH</sup> MAY**

Show 9am & Sale 11.30am

## 32 Bulls & 33 Females

Also: Full Dispersal of the Fole Simmental Herd (25 head) of Joe & Rachel Ede, Stoneleys, Checkley, Stoke on Trent

To be held at:

**Worcester Livestock Market,**  
The Heath Meadow, Nunnery Way,  
Worcester, Worcestershire, WR4 0SQ

Sponsored By:

## PEDIGREE & COMMERCIAL LIVESTOCK SALES

- 5 Livestock Markets
- Official Auctioneers to many Breed Societies, Sheep & Cattle
- Farm Sales/ Dispersal Sales
- Online Bidding Facilities available

7<sup>th</sup> May 2022 - British Simmental Cattle Society Sale

## **PURCHASERS SHEET**

*Please complete and hand to the Auctioneers  
before making your first purchase*

# General Information & Sale Notes

## Timetable of Events:-

### Friday 6<sup>th</sup> May

Arrival of stock	2pm - 4pm
Market Canteen open	2pm - 6pm

### Saturday 7<sup>th</sup> May

Arrival of stock	6am - 7am
Inspection of stock	7am
Judging	9am
Sale	11.30am
Market Canteen open	from 7am

**CONDITIONS OF SALE:** The sale is held subject to the Auction Rules and Conditions of the BSCS together with the Auctioneers' General Conditions of Sale, both available on request. In the event of any discrepancy between the two sets of conditions, the N.B.A Conditions of Sale shall prevail.

**METHOD OF SALE:** All cattle will be sold in guineas (105) pence and strictly in catalogue order, unless any alteration is announced by the Auctioneers.

**COMMISSIONS:** The Auctioneers will dutifully execute commissions to purchase for buyers unable to attend the sale personally, upon receipt of written instructions.

**PEDIGREE TRANSFERS:** Official Pedigree Transfers will automatically be processed if you are a British Simmental Society Member, and will be at a fee of £19.84 (inc VAT) per animal.

**SETTLEMENT AND CLEARANCE OF STOCK:** Settlement in full is due immediately at the close of Sale. No animal may leave the Sale Premises without an official 'Pass Slip', obtainable only from the Auctioneers upon settlement.

**ANIMAL WELFARE:** Vendors and Purchasers should note the CODE OF PRACTICE published by the Livestock Auctioneers' Market Committee for England and Wales IS OPERATIVE and that weakly, unhealthy or injured stock will be refused entry by the Auctioneers. Enquiries should be directed through the market office to the Auctioneers' ANIMAL HEALTH AND WELFARE OFFICER.

**OFFICIAL SALE RULES:** All animals entered for sale under the auspices of any breed society shall be sold subject to and in accordance with the following rules:

- 1) The consignor must be a member of the relevant Breed Society. All animals must be clearly tagged with Ministry Approved Eartags and registered in the Herd Book of the relevant Society by the Breeder, or in the case of imported animals, have been registered in the Herd Book of the country of origin and entered in the Herd Book of the Relevant Society.
- 2) Should any dispute arise as to the identification in the Herd Book of the relevant Society of any animal exposed for sale or as to the pedigree of any such animal, such dispute should be referred to the Council of the relevant Society or such Sub-Committee as the Council may appoint as Arbiters and their decision shall be final.
- 3) The Council of the relevant Society may, prior to any Sale, nominate and appoint a Panel of its members to inspect any animal forward at the Sale, in order to ascertain that such animals are fit for inclusion in the Sale. The Members so appointed shall, in consultation with the Auctioneers, be the sole judges as to whether or not such animals may be included in the Sale and shall have power to debar from the Sale any animal which they consider is not of a fit standard. No consignor will have any claim for damages in respect of any animal which is rejected under this rule.

## SALE DAY CONTACTS

WORCESTER MARKET  
JAMES AMPHLETT

Office: 01905 769770  
Office: 01905 769770

Mobile: 07972 65307

**BRITISH SIMMENTAL CATTLE SOCIETY SHOW & SALE,  
WORCESTER LIVESTOCK MARKET,  
SATURDAY 7<sup>TH</sup> MAY**

**Judge: Mr Anthony Davies**

**Schedule of Classes**

1. Males born between 17/05/20- 22/11/20
2. Males born between 10/12/20- 10/02/21
3. Female born before 2020
4. Female born in 2020
5. Female born in 2021

The Society reserve the right to sub- divide any class if the numbers forward warrant it.

Rosettes will be awarded to championship winners.

**CHAMPIONSHIPS**

**Overall Champion**

Will receive a Perpetual Trophy in memory of Michael Mercer donated by the Mercer Family.

**Male Champion**

Will receive a Perpetual Trophy given by Keith Sherrell.  
Rose Bowl, sash and rosette presented by British Simmental Cattle Society

**Reserve Male Champion**

Will receive a rosette

**Female Champion**

Will receive a Perpetual Trophy given by the South West Simmental Club.  
Rose Bowl, sash and rosette presented by British Simmental Cattle Society

**Reserve Female Overall Champion**

Will receive a rosette

**THE SOCIETY WOULD LIKE TO THANK ALL BSCS  
MEMBERS FOR YOUR SUPPORT**

## IMPORTANT NOTICE TO VENDORS

**HEALTH SCHEMES:** Any consignor selling cattle at the sale must be a member CHecS approved scheme. The enclosed health declaration form must be completed and returned with sale entries or sent direct to Society Office.

**BVD:** All animals must adhere to the rules regarding BVD. See Society website for more information.

**DNA:** all bulls must be sire verified. Bulls which are not sire verified prior to sale catalogue going to print will be excluded from the sale.

**TB PRE-MOVEMENT TESTING:** All cattle over the age of 41 days moving out of 1 yearly tested herds and must be pre-movement tested within 60 days prior to sale.

**INSPECTION:** All animals entered for the Show and Sale must be presented for the breed and veterinary inspection. A veterinary surgeon appointed by the Society will carry out inspections and all animals will be placed in a crush for this procedure. Such inspection, however, shall not be implied to give any warranty as to soundness under the Conditions of Sale. A Council member will carry out the breed inspection and the minimum weight for age standard (see notes below). All animals forward for the inspection will be sale numbered. Any animal which fails any part of the presale inspection will have its ticket red spray marked. These animals will be eligible to remain in their allocated pens but must not have their spray marked numbers removed. Any vendor or his representative failing to comply with this will face disciplinary action by the Society. The Inspectors decision will be final and binding and any vendor will forfeit their entry fee.

**WEIGHT FOR AGE STANDARDS:** All Bulls will be subject to a weight for age standard and will be weighed at the sale. The weight at sale relative to age is similar to the existing standard - BUT IT IS THE BULL'S WEIGHT ON THE DAY which will be the acceptance weight. Please make sure you allow for loss of weight during transport.

**ESTIMATED BREEDING VALUE (EBV's):** All animals entered will automatically have Breedplan information published in the sale catalogue in accordance with the Society's rules.

**UK TAGS:** Will be examined by a member of the Council of the Society, or a Society appointed representative, as an integral part of the pre-sale inspection procedure. Any animal which is found to have faulty, illegible or incorrect tag will not be accepted for the Show and Sale and will be made the subject of an enquiry by the Council thereafter as to identity. Vendors are therefore urged to check carefully the UK tags of their animals at the time of entry so that any irregularities may be corrected in accordance with the Society Regulations before inspection, in other words:- CORRECT EAR-MARKING IS FUNDAMENTAL TO THE INTEGRITY OF YOUR BREED AND YOUR SOCIETY, MAKE SURE YOU HAVE "GOT IT RIGHT".

**UPSET PRICES:** There will be an 'Upset Price' of 2000 guineas on each bull presented for sale - ie. if no opening bid of 2000gns is received for any particular lot, that lot will be passed out of the ring unsold.

**VENDORS:** Must have at least one person in charge of their animals and such person will be responsible for their stock at all times.

A special levy of 1.5% of the gross sale price will be charged by the Society in respect of all sales. Such levy will be deducted from the proceeds of sale by the Auctioneers before settlement. All animals must be shown unless specifically exempted by the Stewards, who have the authority to reject any unruly animal from the show and, at their discretion, from the Sale.

Every animal must be trained to lead and must be provided with a serviceable halter, which will become the property of the Purchaser.

## **RULES**

### **15.8 Veterinary Inspection**

All animals must be placed in a suitable crush in the market to allow the Society's Veterinary surgeon to carry out inspections at collective sales. All animals rejected on veterinary or breed standard grounds will not be allowed through the sale ring. Animals entered as a DRAFT will be inspected on the vendors holding for genetic defects. A Vet letter provided to the Society prior to the sale day confirming inspection.

#### **15.8.1 Teeth**

Teeth must make proper contact with the dental pad of the upper jaw but due allowance will be made for the age and dental development of the animal. Any animal with severely undershot or severely overshot jaws will be rejected and progeny from such animals will not be accepted into the BSCS herd book 10 months after the sale inspection date. Where the veterinary surgeon declares that an animal is marginally overshot or undershot that animal may still be offered through the sale but will be excluded from the show. The Auctioneer will announce that at the point of inspection of animal was found to be marginally overshot or undershot

#### **15.8.2 Testicles**

Bull's testicles will be measured and inspected by the veterinary surgeon. They must be a minimum size of 36 cm in circumference (14 Months), and 38 cm (over 18 months), measured at the widest point of the scrotum. The vet retains the right at his discretion to reject any bulls with uneven or soft testicles. Progeny from bulls with small/uneven/soft testicles which fail inspections will not be accepted into the BSCS herd book 10 months after the sale inspection date. Bulls which may have suffered injury will be considered on a case by case basis.

#### **15.8.3 Warts**

Animals with active warts must be treated by the member's veterinary surgeon before the sale, and a vet's certificate should be available for inspection at the Sale.

#### **15.8.4 General Health**

Animals with active infections, a contagious disease, or a disorder or condition, may be rejected by the veterinary surgeon. Minor injuries may be treated by a veterinary surgeon in the market but this must be announced at the time of sale. The decisions of the veterinary surgeon appointed by the Society are final and binding. Any animal, which is considered by the vet to be not in a healthy and proper condition to be presented as representing a good specimen of the breed at an official collective sale, will be rejected.

**15.8.5** Vendors who declare in a sale catalogue that a bull is semen tested, or have it announced at point of sale must provide a copy of the semen test to the auctioneers

**This sale is held under the Auspices of the British Simmental Cattle Society Ltd and a full set of rules are available upon request from the Society.**

## **THE BRITISH SIMMENTAL CATTLE SOCIETY**

National Agricultural Centre

Stonleigh, Kenilworth, Warwickshire, CV8 2LG

Tel: Coventry (02476) 696513 [information@britishsimmental.co.uk](mailto:information@britishsimmental.co.uk)

**IT IS ESSENTIAL THAT THE FOLLOWING DOCUMENTS ACCOMPANY ANIMALS TO THE SALE PREMISES**

and are handed to the Auctioneers upon the arrival to the market  
**DECLARATION FORM, CATTLE PASSPORTS, CID/CCD, CTS, TB DECLARATION (if necessary). ANY ANIMAL NOT IN POSSESSION OF THE REQUIRED DOCUMENTS WILL NOT BE OFFERED FOR SALE. PLEASE NOTE IT IS ILLEGAL TO MOVE ANY ANIMAL WITHOUT THEIR RESPECTIVE PASSPORT DOCUMENTATION.**

# UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE

Only British Simmental GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

## ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait and they are to be used as a tool to assist in the selection of sires, the visual appearance remains very important.

## ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

## CALVING EASE

Calving ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**DIR:** Direct calving ease indicates how this animal influences the birth of its progeny.

Calving Ease (DIR) EBVs are estimates of genetic differences in the ability of a sire's calves to be born unassisted from **2 year old helpers**. The EBVs are reported as differences in the percentage of unassisted calvings.

Higher, more positive, Calving Ease (DIR) EBVs are more favourable. For example, a bull with an EBV of +5.0% would be expected, on average, to produce 3% fewer difficult calvings **from 2 year old helpers** than a bull with an EBV of -1.0% (6% difference between the sires, then halved as they only contribute half the genetics). **Cow condition is a significant factor on the ability and ease of calving.** Continued use of sires with easy calving may reduce the size of the cows and average pelvic area in the herd

**DTRS:** Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

Calving Ease (DTRS) EBVs are estimates of genetic differences in the ability of a sire's daughters to calve at 2 years of age without assistance. The EBVs are also reported as differences in the percentage of unassisted calvings.

Higher, more positive, Calving Ease (DTRS) EBVs are more favourable. For example, a bull with an EBV of +4.0% would be expected to on average produce daughters that have 3% less calving problems when calving at 2 years of age than the daughters of a bull with an EBV of -2.0%.

## **BIRTH AND FERTILITY**

**GL:** Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth. For example, a bull with a Gestation Length EBV of -2 days would be expected to produce calves that are born earlier, and more easily, than a bull with a Gestation Length EBV of +2 days.

**BWT:** Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers. Birth Weight EBVs are expressed in kilograms (kg) and are calculated based on weights of calves taken at birth. Small, or moderate, Birth Weight EBVs are more favourable. For example, a bull with a Birth Weight EBV of +2 kg would be expected to produce lighter calves at birth than a bull with a Birth Weight EBV of +6 kg, with a lower risk of a difficult birth.

**Please note, whilst low Birth Weight EBVs are favoured for calving ease they are also generally associated with lower overall growth potential.** Consequently, birth weight and growth need to be carefully balanced. Fortunately, animals can be found that have both moderate Birth Weight EBVs and above average EBVs for later growth.

**SS:** Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. Increased scrotal circumference is associated with increased semen production in bulls, and earlier age at puberty of bull and heifer progeny. Increased scrotal circumference also has a favourable relationship with days to calving, such that bulls with larger scrotal circumference tend to have daughters with shorter days to calving. For example, a bull with a Scrotal Size EBV of +4 cm would be expected to produce sons with larger testicles at yearling age and daughters that reach puberty earlier than the progeny of a bull with a Scrotal Size EBV of -4 cm.

## **GROWTH**

**MILK:** 200 Day Milk EBVs are estimates an animal's maternal effect on the 200 day weight of its calf. In the case of sires, this estimates the maternal effect that his daughters will have on the 200 day weight of their progeny. The 200 Day Milk EBV is expressed as kilograms (kg) of calf live weight at 200 days (ie. the expected difference in the weight of the calf at 200 days due to the maternal effect (milk) of the cow). The 200 Day Milk EBV is calculated by partitioning the difference in the 200 day weight of calves into growth and milk components.

The optimum level of milk production potential among beef cows is dependent upon the production system and environment in which the cows are run. Selection for increased milk production may be warranted when cows are run under good nutritional conditions and calves are sold as weaners. However, some environments may not support high milking cows.

Larger, more positive, 200 Day Milk EBVs are generally more favourable, depending on the environment. For example, a bull with a 200 Day Milk EBV of +15 kg would be expected to sire daughters with higher milk production than a bull with 200 Day Milk EBV of +5 kg. This higher milk production potential should be reflected through higher weaning weights among the daughter's calves.

**200:** 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400:** 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600:** 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

## CARCASE

**CWT:** Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

**EMA:** Eye Muscle Area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals. Larger, more positive, EMA EBVs are generally more favourable. For example, a bull with an EMA EBV of +4 cm<sup>2</sup> would be expected to produce steer progeny with a greater degree of muscle expression than a bull with an EMA EBV of +1 cm<sup>2</sup>.

**RIB:** Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**RB%:** Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

## **Terminal Index**

The BSCS Terminal index is aimed at a commercial herd using Simmental bulls over large framed, mixed breed cows to breed steers and heifers to turn off at 16 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 630 kg live weight (335 kg carcase weight) using a pasture based production system supplemented with extra rations during the finishing phase.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 16 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher calving ease direct EBV when selecting a sire using this index.

### **Self Replacing Index**

The BSCS Self Replacing index is aimed at a Simmental herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 16 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 680 kg live weight (350 kg carcass weight) using a pasture based production system supplemented with extra rations during the finishing phase.

This Self Replacing index is also suitable to using Simmental sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

The British Simmental GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the British Simmental Cattle Society nor the ABRI oversee or audit the collection of this data.

## Understanding the new EBV Graph

The BSCS is moving to a new graph for pen cards for all animals at Society sales. The new graph has been available for sometime as part of the Breedplan package used for performance recording and includes more detailed information on individual EBV values compared to the old graph. The new graph allows the buyer to see clearly where the animal's individual traits fall in relation to breed average and also include the accuracy value.

Of course, as the EBV takes into account all the pedigree and performance information that is available at this point in time, the EBV is also the most reliable indication available of the animals breeding value for each trait at this point in time.

Within the display of the EBV Graph:

- The actual EBV Accuracy for each trait is shown at the right side of the graph.
- The Breed Avg values are listed in the centre of the graph and reflect the average EBV's of current animals within the breed (ie. all 2 year old animals).
- The minimum and maximum EBV values are displayed at the left and right of the graph for each trait represented
- The horizontal bar (shaded/coloured area) displays where the animal is placed in relation to the current animals within the breed for each trait.
- As an illustration of the interpretation of the EBV graph, in the example below the animals 400 Day Wt EBV is of higher accuracy than the Eye Muscle Area EBV (because it's horizontal bar is much narrower) and so there is less possible change in the 400 Day Wt EBV as additional information becomes available. Conversely, the EMA EBV may change when additional information becomes available.

EBV Graph for OMORGA VOLVO

First calving heifer from one of our foundation cows. Sire, Heathbrow Impulse is half brother to famous Heathbrow Important. Khloe was shown as a calf at Winter Stock Festival 2019, receiving 3rd place and being the youngest in her class, a good correct, polled heifer. Ran with bull from 27th March 2022 - Scan details to follow.

# FOLE DISPERSAL

Full Dispersal of the Fole Simmental Herd of  
Joe & Rachel Ede, Stoneleys, Checkley, Stoke on Trent

**18 ANIMALS AND 7 CALVES AT FOOT**

## Sale Foreword

I have loved my Simmentals - and still do - but age has got the better of me.

My love of Simmentals was ignited in the early 1980s when I purchased a dairy cow in calf to a Simmental. She went on to have a heifer calf who, in turn, entered the dairy herd. I was very impressed with her performance.

Fole Simmentals was founded in 1988 with the private purchase of Harrison's Nora and Coomberry Rossalind, along with Twyford Vivian in 1989. Between 1989 and 1998 the herd was Signet recorded and scanned.

Highgate Edwina was instrumental in starting the "Rachel" family, two of whom attained Elite Breeder Status.

The "Margaret" family began with Great well Margaret, purchased at the dispersal sale.

For 30+ years I have consistently selected for ease of calving and wedge shaped confirmation.

The majority of bulls have been purchased from Perth / Stirling, including Blackford Falcon in 1996 for 13,000 Gns. He was number one for calving ease for several years - now ranked 3rd.

For 19 years the herd was entered in the Staffordshire & Birmingham Agricultural Society Pedigree Inter Breed Beef Competition, always achieving first or second place.

I hope today's purchasers go on to enjoy and love them as much as I do.

Joe Ede

# AUCTIONEER'S TERMS & CONDITIONS OF SALE

(Incorporating the Auctioneer's terms and Conditions as recommended by the National Beef Association)

1. The biddings to be regulated by the Auctioneers and the highest bidder, subject to the Vendor's reserve (if any), to be the purchaser. No bid shall be retracted and if any dispute should arise between two or more bidders, the Lot in dispute to be put up again and resold, or the Auctioneers may determine the dispute at their own discretion and their decision shall be final. The Auctioneers reserve the right to refuse the bid of any person without being called upon to give reason for such action.

2. The Purchaser to give his full name and dwelling place and pay for all Lots purchased immediately at the close of sale. No Lot or Lots shall be removed from the sale premises until paid for and a pass-out slip obtained from the Auctioneer's clerk but each and every Lot shall immediately at the fall of hammer be considered as delivered and be and remain in every respect at the absolute risk and expense of the respective purchaser or purchasers thereof and shall be removed from the sale premises at the purchaser's expense. The right of property shall not pass until the full purchase price is paid.

3. Purchasers paying by cheque must be prepared, if required, to produce a banker's reference. As a result of the Money Laundering Regulations (2003) the auctioneers are unable to accept cash payments in excess of nine thousand pounds sterling for any single or linked purchase transaction.

4. All statements in the catalogue, or made by the Auctioneers at the time of sale, also the correct identification of the animals, are the entire responsibility of the Vendors. The Auctioneers take no personal responsibility for the correctness of such statements or identities.

5. All statements in the catalogue, or any made by the Auctioneers at the time of sale relating to any veterinary or other tests are to be taken as statements of fact only. No such statements shall guarantee the purchaser of any animal against loss arising from the subsequent reaction of such animal to any test administered after the sale and the Vendors shall not be liable in any way should this occur.

6. All stock is sold subject to the Conditions of Sale recommended for use at markets by the Livestock Auctioneers' Markets Committee for England and Wales except in so far as these conflict with any Special Conditions applicable to the sale of pedigree stock, when the latter Conditions shall prevail.

7. Neither the Vendors nor the Auctioneers will be responsible for any accident or injury to persons or property, through fire or any other cause whatsoever, nor for any damage by animals prior to, during or after the sale.
8. No undertaking by the Auctioneers or their servants to take charge of any Lot or Lots after the sale or to forward them to their destination shall be held to impose upon the Auctioneers any legal obligation or vitiate any of these conditions.
9. In as much as the Auctioneers act as agents for a disclosed principal they shall not be considered personally responsible for any default on the part of either purchasers or Vendors and the remedy shall be against them only and not against the Auctioneers.
10. If these conditions are unfulfilled, the Vendors or Auctioneers shall have the power to resell the Lots, retaining any surplus and charging any deficiency and expense to the defaulter.
11. You have a right to know how we will use the information you have provided to us. We may share the information with other members of our group and may make this information available to relevant media groups and other interested parties on request. We and other members of the group may contact you by telephone, e-mail post or fax to inform you of products or services available. If you do not want to be contacted for marketing purposes or do not wish your information to be made available to any other parties please notify in writing.

# Premier Cattle Drench Maximise Performance and Fertility in all Growing and Adult Cattle

*Not all mineral drenches are the same*
