

# GOLDEN COW AWARD

The Golden Cow award was introduced in 2018, and as a replacement for the Elite Cow Scheme. In addition to looking at the EBV's for a cow and her progeny, to indicate the breeding potential of pedigree stock, the Golden Cow also takes into account the Simmental Female Classification scores for the important relevant pedigree and functional traits in breeding females.

## Summary Qualifying Criteria for Golden Cow Award

- Cow must have five calves with an average calving interval of 13 months (twins are classed as one calving).
- Cow must have TI & SRI indexes above breed average
- Last five calves must be fully pedigree registered
- Cow must be classified as Excellent

Once becoming a Golden Cow, this status remains with the cow whilst she is live and active in the BSCS Herdbook. Listed here are the cows which have been awarded Golden Cow status for the first time in 2025, and with a further list of those Golden Cows awarded since 2018 and who are still active in the herdbook.
